REMOTE ACCESS

Three recommended methods

TO E-RESOURCES

Important sources of information for your studies are available 24/7. You can access them **from PCs at the University of Ostrava** or **from the outside of the university network** (from home) via authorised remote access:
EDS, Shibboleth/EduID or FortiClient.

1. EDS

- Access at eds.osu.cz
- You can search without logging in.
- To view the full text, log in with the same name and password as for the UO Study Portal.
- The service provides more convenient online access to full-text articles and their fast download. You can search and retrieve content from the University of Ostrava's subscribed e-resources with a single query.

2. Shibboleth / EduID

- Go to Licensed databases and select the e-resource from the menu.
- After clicking on the selected e-resource, search for "Shibboleth Login" or "Institutional Login".
- In the form "Select your regional group" enter "Czech academic identity federation (EduID.cz)". For other databases enter "University of Ostrava".
- Select "Ostravská univerzita / University of Ostrava / Universitas Ostraviensis" from the "Czech academic identity federation (EduID.cz)" menu.
- Log in with the same name and password you use for the UO Study Portal.

3. FortiClient

- Download and install the "FortiClient VPN-only" client: https://www.fortinet.com/support/product-downloads
- Once installed, you can log in with the same name and password you use for to the UO Study Portal.
- In you have any problems with remote access from home, please contact us by email sarka.kostecka@osu.cz
